

WEEK 2
ASSIGNMENT

PROMPT

R+T+C+F+R Framework

PRAVEENKUMAR PONNUSAMY

R+T+C+F+R FRAMEWORK

EXPLANATION

The R+T+C+F+R framework is a structured approach to prompt engineering designed to minimize ambiguity and maximize AI performance.

Role (R): Establishes the persona or expertise level the AI should adopt.

Task (T): Clearly defines the specific objective or action required.

Context (C): Provides background information, constraints, or audience details to guide the response.

Few Shot (F): Offers examples to set the desired standard and format for the output.

Report (R): Specifies stylistic requirements, such as tone, structure, or length.

Example : Application

Business Proposal.

- **Role (R):** You are an experienced Business Consultant.
- **Task (T):** Write a proposal for a new digital marketing project.
- **Context (C):** The client is a small local bakery looking to increase their social media engagement
- **Few-Shot/Format (F):** Structure the proposal with three sections: Objectives, Methodology, and Expected Benefits.
- **Report (R):** Ensure the tone is professional, persuasive, and highlights measurable growth.

A. BASIC PROMPT TEMPLATES

1. **AI Explanation:** "Act as an AI tutor. Explain 'Artificial Intelligence' to a beginner using simple terms, short sentences, and 3 real-life examples like voice assistants."
2. **Summarization:** "Act as a professional text summarizer. Summarize the provided text on Machine Learning into exactly 3 clear bullet points covering the main idea, types, and impact."
3. **Paraphrasing:** "Act as an English paraphrasing expert. Rewrite the given sentence about Machine Learning without changing its meaning, ensuring it remains simple and readable."
4. **Definition:** "Act as a technology educator. Define 'Deep Learning' for beginners in short, clear language, including one real-world example."
5. **Comparison:** "Act as a career analyst. Compare AI and ML professions in a table format based on salary, job roles, and earning potential."

6. Role + Explanation

You are a Baker. Explain the concept of making cake to beginners:

Role (R):

Professional Baker and Cooking Instructor

Task (T):

Explain the process of making a cake to beginners

Context (C):

The audience has no baking experience and needs simple step-by-step guidance using easy language

Few Shot (F):

Example: "First, mix flour, sugar, eggs, and butter to prepare the cake batter."

Report (R):

The explanation should be beginner-friendly, clear, short, and include the basic steps of cake making

7. Style Mimicry

Write like Rabindranath Tagore: “The beauty of rain”

Role (R):

Creative Writer in Tagore-Inspired Style

Task (T):

Write about “The beauty of rain” in a poetic and emotional style inspired by Tagore

Context (C):

The writing should express nature, emotions, peace, and beauty using simple yet artistic language similar to Tagore’s style

Few Shot (F):

Example: “The rain whispered softly to the earth, filling the silent air with music and life.”

Report (R):

The output should be poetic, emotional, elegant, and deeply connected with nature.

8. Professional Writing

You are a Marketing Manager. Write a Marketing Plan for a New Product

Role (R):

Professional Marketing Manager

Task (T):

Create a marketing plan for launching a new product

Context (C):

The marketing plan should explain target audience, promotional strategies, branding, and sales goals in a professional and easy-to-understand way

Few Shot (F):

Example: “Use social media campaigns and influencer promotions to increase product awareness among young customers.”

Report (R):

The output should be clear, structured, professional, and include practical marketing strategies.

C. Few-Shot Prompt Templates

9. Classification Template

Classify food review sentiment:

- “The pizza was delicious and perfectly cooked.” — Positive
 - “The soup was cold and tasteless.” — Negative
 - “[NewInput]” — __
-

Role (R):

Food Review Sentiment Analysis Expert

Task (T):

Classify the sentiment of food reviews as Positive, Negative, or Neutral

Context (C):

The input will contain customer opinions about food taste, quality, service, or restaurant experience

Few Shot (F):

Example 1: “The pizza was delicious and perfectly cooked.” → Positive

Example 2: “The soup was cold and tasteless.” → Negative

Report (R):

The output should provide only one sentiment label: Positive, Negative, or Neutral.

10. Translation Template

Translate the following sentences into Tamil:

English Sentence:

“The biryani served at the restaurant was spicy, flavorful, and freshly prepared.”

Role (R):

Professional Translator (English to Tamil)

Task (T):

Translate the given English sentence into Tamil accurately

Context (C):

The translation should preserve the original meaning and sound natural and clear for Tamil readers

Few Shot (F):

Example:

“The food was very tasty.” → “உணவு மிகவும் சுவையாக இருந்தது.”

Report (R):

The output should be fluent, natural, and grammatically correct Tamil

11. Question Answering Template

Answer these questions:

- What is the most popular fast food item? — Burger
 - Which drink is commonly served hot? — Coffee
 - What ingredient is mainly used to make pizza dough? — __
-

Role (R):

Food and Culinary Question Answering Expert

Task (T):

Answer food-related general knowledge questions accurately

Context (C):

The questions are simple food and cooking related facts that require short and direct answers

Few Shot (F):

Example 1: What is the most popular fast food item? → Burger

Example 2: Which drink is commonly served hot? → Coffee

Report (R):

The response should provide only the correct and concise answer without extra explanation.

D. Chain-of-Thought (CoT) Templates

12. Step-by-Step Reasoning

Let's think step by step.

Problem Statement:

If a restaurant sells 25 pizzas per hour for 4 hours, how many pizzas are sold in total?

Role (R):

Step-by-Step Reasoning Assistant

Task (T):

Solve the given problem using clear step-by-step reasoning

Context (C):

The problem is a simple mathematical word problem related to restaurant sales and multiplication

Few Shot (F):

Example:

If a bakery sells 10 cakes per day for 5 days, then $10 \times 5 = 50$ cakes.

Report (R):

The solution should clearly explain each step and provide the final answer in a simple and easy-to-understand format.

13. Math Problem Solving

Solve this food business problem by showing your work:

Problem:

A restaurant sells 120 burgers on Monday and 150 burgers on Tuesday. If each burger costs ₹80, what is the total revenue earned from burger sales on both days?

Role (R):

Food Business Mathematics Expert

Task (T):

Calculate the total revenue earned from burger sales using step-by-step mathematical reasoning

Context (C):

The problem involves restaurant sales, addition, and multiplication to determine total earnings

Few Shot (F):

Example:

If a café sells 50 coffees at ₹40 each, then revenue = $50 \times 40 = ₹2,000$.

Report (R):

The solution should clearly show all calculations and provide the final answer in a simple format.

14. Logical Puzzle

Solve the following food-related logic puzzle. Show your reasoning process:

Puzzle:

In a restaurant kitchen, there are three chefs standing in a row:

- Two chefs are in front of a chef.
- Two chefs are behind a chef.
- One chef is standing in the middle.

Question:

How many chefs are there in total?

Role (R):

Logical Reasoning Puzzle Solver

Task (T):

Analyze the clues and determine the total number of chefs

Context (C):

The puzzle involves understanding positions in a line and applying logical reasoning to interpret the clues correctly

Few Shot (F):

Example:

Three students stand in a line. One is in the middle, one is at the front, and one is at the back. Total students = 3.

Report (R):

The solution should briefly explain the reasoning and clearly state the final answer.

15. Output Formatting

Summarize the article below in exactly 2 bullet points.

Article:

Pizza is one of the most popular foods in the world. It is made using dough, tomato sauce, cheese, and various toppings such as vegetables, chicken, or mushrooms. Pizza is enjoyed by people of all ages and is available in many styles and flavors. It can be prepared at home or purchased from restaurants and food delivery services. Besides being delicious, pizza is often shared during family gatherings, parties, and celebrations.

Role (R):

Structured Output Formatting Expert

Task (T):

Summarize the given passage into exactly 2 bullet points

Context (C):

The passage explains what pizza is, its ingredients, popularity, and common occasions where it is enjoyed

Few Shot (F):

Example:

- Main idea of the topic
- Key benefits, features, or importance

Report (R):

The output must contain exactly 2 clear and concise bullet points covering the most important information.

16. Table Generation

Create a table comparing Pizza, Burger, and Sandwich based on preparation time, popularity, and average price.

Role (R):

Food Industry Data Analyst

Task (T):

Create a comparison table for Pizza, Burger, and Sandwich

Context (C):

The comparison is intended for food enthusiasts and restaurant customers who want to understand differences in preparation time, popularity, and pricing

Few Shot (F):

Food Item	Preparation Time	Popularity	Average Price
Pizza	20–30 mins	High	₹250–₹500

Report (R):

The output should be simple, structured, and clearly compare all three food items in a table format.

17. Email Writing

Write a professional email to a Restaurant Manager regarding a shortage of ingredients for the weekend menu. Use a formal tone.

Role (R):

Professional Business Email Writer

Task (T):

Write a formal email to a restaurant manager informing them about a shortage of ingredients and requesting necessary action

Context (C):

The restaurant is expecting high customer demand during the weekend, but some essential ingredients are running low. The manager needs to be informed professionally.

Few Shot (F):

Example:

“Dear Manager, I would like to inform you that our current stock of ingredients may not be sufficient to meet the expected weekend demand.”

Report (R):

The email should include a subject line, clear explanation of the issue, polite request for action, professional tone, and courteous closing.

18. Tailored Explanation

Explain healthy eating habits to a high school student who understands basic nutrition.

Role (R):

Health and Nutrition Educator

Task (T):

Explain healthy eating habits in a simple and engaging way for a high school student

Context (C):

The student has basic knowledge of nutrition but wants to learn how to make healthier food choices and maintain a balanced diet

Few Shot (F):

Example:

“A balanced diet is like giving your body the right fuel. Just as a car needs good fuel to run smoothly, your body needs healthy foods to stay active and strong.”

Report (R):

The explanation should be simple, relatable, and include practical examples of healthy food choices and eating habits.

19. Industry-Specific Context

As a Restaurant Manager, explain how technology and automation impact the food service industry.

Role (R):

Restaurant Operations and Technology Expert

Task (T):

Explain the impact of technology and automation on restaurants and food service businesses

Context (C):

The explanation should focus on real-world applications such as online ordering, self-service kiosks, inventory management, digital payments, and customer service improvements

Few Shot (F):

Example:

“In restaurants, online ordering systems help customers place orders quickly while reducing manual work for staff.”

Report (R):

The response should be structured, simple, and highlight key benefits with practical examples from the food service industry.

G. Creative Writing Prompts

20. Story Writing

Write a short story about a young chef who dreams of opening his own restaurant but faces many challenges.

Role (R):

Creative Story Writer

Task (T):

Write a short story based on the given theme

Context (C):

The story is about a young chef who is passionate about cooking and dreams of opening his own restaurant but struggles with financial and personal challenges

Few Shot (F):

Example:

“Arun loved cooking from a young age, but starting a restaurant seemed impossible because he lacked money and experience.”

Report (R):

The story should be short, engaging, emotional, and include a meaningful or hopeful ending.

21. Poem Writing

Write a poem in Sonnet Form about “Delicious Food”

Role (R):

Poet (Sonnet Specialist)

Task (T):

Write a sonnet poem about delicious food

Context (C):

The poem should celebrate the joy of food, flavors, cooking, and sharing meals using vivid imagery and poetic language

Few Shot (F):

Example Line:

“The golden feast upon the table gleams with grace.”

Report (R):

The output should be a structured 14-line sonnet with lyrical, expressive, and vivid language.

22. Dialogue Writing

Write a realistic dialogue between a customer and a restaurant owner discussing a new menu.

Role (R):

Dialogue Writing Expert

Task (T):

Write a realistic conversation between a customer and a restaurant owner

Context (C):

The discussion focuses on a newly launched menu, customer opinions, favorite dishes, pricing, and suggestions for improvement

Few Shot (F):

Example:

Customer: I heard you've introduced a new menu. What's special about it?

Owner: We've added several healthy and international dishes based on customer feedback.

Report (R):

The dialogue should sound natural, engaging, and reflect a realistic restaurant conversation.

23. Code Generation

Write a Python function that calculates the total bill amount in a restaurant.

Role (R):

Python Programming Expert

Task (T):

Write a Python function that calculates the total restaurant bill including tax

Context (C):

The function should accept the food amount and tax percentage as input and return the final bill amount

Few Shot (F):

Example:

`calculate_bill(500, 5)` → 525

Report (R):

The code should be simple, readable, and correctly calculate the final bill amount

24. Debugging

Help! Here is some code. Find and fix any errors:

```
def calculate_total(price, quantity)
```

```
    total = price * quantity
```

```
    print("Total:", total)
```

Role (R):

Python Debugging Expert

Task (T):

Identify and fix syntax, logical, or runtime errors in the given code

Context (C):

The code is intended to calculate and display the total cost of food items but contains errors

Few Shot (F):

Example:

Incorrect:

```
print("Hello
```

Correct:

```
print("Hello")
```

Report (R):

The response should provide corrected code and briefly explain what was fixed

25. API Documentation

Explain how to use the Restaurant Menu API with an example request and response.

Role (R):

API Documentation Specialist

Task (T):

Explain how to use a restaurant menu API including endpoints, parameters, and responses

Context (C):

The explanation should help beginner developers understand how to retrieve restaurant menu information using API requests

Few Shot (F):

Example:

Request:

```
GET /menu/1
```

Response:

```
{  
  "id": 1,  
  "item": "Chicken Biryani",  
  "price": 250  
}
```

Report (R):

The output should be structured, simple, and developer-friendly with request and response examples.

26. Ad Copywriting

Write a compelling advertisement for “Chocolate Cake” targeting “Children”.

Role (R):

Creative Advertising Copywriter

Task (T):

Write a fun and engaging advertisement for chocolate cake aimed at children

Context (C):

The advertisement should be playful, exciting, and attractive to kids while highlighting taste, fun, and enjoyment

Few Shot (F):

Example:

“Treat yourself to the yummiest chocolate delight in town—every bite is packed with happiness!”

Report (R):

The output should be short, catchy, fun, and emotionally appealing to children.

27. Product Description

Write a persuasive product description for a Premium Chocolate Cake.

Role (R):

E-commerce Copywriter

Task (T):

Write a persuasive product description for a premium chocolate cake

Context (C):

The description should attract customers and highlight taste, freshness, ingredients, and quality

Few Shot (F):

Example:

“Enjoy the rich taste of premium cocoa blended with soft, moist layers for an unforgettable dessert experience.”

Report (R):

The output should be concise, engaging, and persuasive, focusing on benefits and customer experience.

28. Social Media Post

Create a social media post promoting a “Food Festival” in a friendly tone.

Role (R):

Social Media Content Creator

Task (T):

Create a friendly and engaging social media post promoting a food festival

Context (C):

The post should encourage participation, showcase delicious food, and create excitement among food lovers

Few Shot (F):

Example:

“Join us this weekend for a feast of flavors, fun, and unforgettable food experiences!”

Report (R):

The output should be short, catchy, motivational, and suitable for platforms like Instagram and Facebook.

29. Response to Complaint

Respond professionally to this customer complaint:

Complaint:

"The pizza I ordered was delivered cold and the delivery was delayed by more than an hour."

Role (R):

Customer Support Representative

Task (T):

Write a professional response to a customer complaint regarding food quality and delayed delivery

Context (C):

The customer is dissatisfied because the food arrived late and was not served at the expected temperature. The response should be polite, empathetic, and solution-oriented.

Few Shot (F):

Example:

"We sincerely apologize for the inconvenience caused. We understand how disappointing it is to receive your order later than expected."

Report (R):

The response should acknowledge the issue, express empathy, apologize professionally, and offer assistance or compensation if appropriate.

30. FAQ Generator

Generate 5 common FAQs and answers for "Online Food Delivery Service".

Role (R):

Content and FAQ Specialist

Task (T):

Generate 5 common FAQs with answers related to an online food delivery service

Context (C):

The FAQs should help customers understand ordering, payment methods, delivery tracking, cancellations, and refunds

Few Shot (F):

Example:

Q: How can I track my order?

A: You can track your order in real time through the app or website after placing your order.

Report (R):

The output should include 5 practical FAQs with clear, concise, and customer-friendly answers.

31. Lesson Plan Creation

Create a lesson plan for teaching “Healthy Food Habits” to Grade III children.

Role (R):

Primary School Curriculum Designer

Task (T):

Create a simple lesson plan to teach healthy food habits to Grade 3 students

Context (C):

The learners are young children, so the content should be fun, simple, interactive, and use everyday food examples they can easily understand

Few Shot (F):

Example:

“Healthy foods like fruits and vegetables help us grow strong and stay active.”

Report (R):

The lesson plan should include learning objectives, a simple explanation, one classroom activity, and a short assessment.

32. Quiz Generation

Generate a 5-question quiz about “Healthy Eating”.

Role (R):

Educational Quiz Designer

Task (T):

Create a 5-question quiz on healthy eating habits

Context (C):

The quiz is intended for general learners and should test basic knowledge about nutritious foods, balanced diets, and healthy lifestyle choices

Few Shot (F):

Example:

Q: Which fruit is rich in Vitamin C?

A: Orange

Report (R):

The output should contain 5 clear questions using either multiple-choice or short-answer format.

33. Homework Help

Explain how to solve this problem on nutrition calculations.

Role (R):

Nutrition Tutor

Task (T):

Explain how to solve a nutrition-related calculation problem step by step

Context (C):

The student needs homework help understanding food calories, nutrients, or dietary calculations and requires a simple explanation

Few Shot (F):

Example:

“To find the total calories consumed, add the calories from each food item eaten during the day.”

Report (R):

The explanation should be clear, step-by-step, and easy for students to follow.

34. ReAct Framework

Thought → Action → Observation → Answer

Problem:

A restaurant's customer ratings have dropped from 4.8 to 4.2 stars in the last two months. Determine a possible cause and suggest an improvement plan.

Role (R):

Restaurant Business Analysis Agent

Task (T):

Analyze the problem using the ReAct (Reasoning + Acting) framework and propose a solution

Context (C):

The restaurant wants to identify the reasons behind declining customer satisfaction and improve service quality

Few Shot (F):

Example:

Thought: Customer complaints may be increasing.

Action: Review customer feedback forms.

Observation: Many customers mention slow service.

Answer: Improve staff scheduling and reduce waiting times.

Report (R):

The response should clearly separate Thought, Action, Observation, and Answer sections and conclude with a practical solution.

35. Tree of Thoughts (ToT)

Generate 3 possible solutions to increase restaurant sales. Evaluate each and choose the best one.

Role (R):

Restaurant Growth Strategy Analyst

Task (T):

Generate multiple solutions for increasing restaurant sales, evaluate them, and select the best option

Context (C):

The restaurant wants to attract more customers and increase revenue through marketing, service improvements, or menu innovations

Few Shot (F):

Example:

Solution 1: Launch social media promotions → High reach, low cost

Solution 2: Add new menu items → Medium reach, moderate cost

Solution 3: Offer loyalty programs → High customer retention, low cost

Report (R):

The output should present three solutions, evaluate each based on impact, feasibility, and cost, and justify the best choice.

36. Self-Consistency Prompting

Solve the problem of improving customer satisfaction in a restaurant using 3 different approaches and select the most consistent solution.

Role (R):

Restaurant Customer Experience Expert

Task (T):

Explore multiple approaches for improving customer satisfaction and determine the most reliable solution

Context (C):

The restaurant wants to improve customer reviews, repeat visits, and overall dining experience

Few Shot (F):

Example:

Approach 1: Improve food quality → Better customer reviews

Approach 2: Faster service → Reduced waiting time

Approach 3: Staff training → Better customer interactions

Consistent Conclusion: Combining staff training with food quality improvements produces the strongest long-term results.

Report (R):

The response should present three independent approaches, compare them, and conclude with the most consistent and effective solution.

37. Prompt Refinement

Improve this prompt:

Original Prompt:

"Write about pizza."

Role (R):

Prompt Engineering Expert

Task (T):

Improve and refine the given prompt to make it clearer, more specific, and structured

Context (C):

The original prompt is vague and lacks details about the audience, content, length, and format

Few Shot (F):

Example:

Original: "Write about dogs"

Improved: "Write a 150-word informative paragraph about dogs, including their characteristics, behavior, and why they are popular pets."

Report (R):

The output should provide a refined prompt with better clarity, structure, and specific instructions

Final Prompt :

Act as a prompt engineering expert. Improve the given prompt by making it clearer, more specific, and well-structured. Ensure the refined prompt defines the topic, target audience, expected content, tone, length, and output format. Present only the improved version of the prompt.

38. Prompt Grading Rubric

Rate this output based on the following criteria:

- Relevance
- Accuracy
- Clarity
- Fluency
- Creativity

Final Score:

Role (R):

Prompt Evaluation and Grading Expert

Task (T):

Evaluate a given response using a defined scoring rubric

Context (C):

The response should be assessed objectively using a scale of 1–5 for each criterion

Few Shot (F):

Example:

Relevance: 4

Accuracy: 5

Clarity: 4

Fluency: 5

Creativity: 3

Final Score: 4.2

Report (R):

The output should provide individual scores and calculate the overall average score

Final Prompt :

Act as a prompt evaluation expert. Rate the given output based on Relevance, Accuracy, Clarity, Fluency, and Creativity using a scale of 1 to 5. Provide a brief justification for

each score and calculate the final average score. Present the evaluation in a clear and structured format.

39. Prompt Iteration Challenge

Take this weak prompt:

Prompt:

"Tell me about burgers."

Rewrite it 3 times to improve clarity and effectiveness.

Role (R):

Prompt Engineering Specialist

Task (T):

Rewrite a weak prompt into three progressively improved versions

Context (C):

The original prompt is too broad and lacks direction, audience, and output requirements

Few Shot (F):

Example:

Weak Prompt: "Explain AI"

Improved 1: "Explain Artificial Intelligence in simple terms."

Improved 2: "Explain Artificial Intelligence in simple terms with examples for beginners."

Improved 3: "Explain Artificial Intelligence in simple terms for beginners, including 2–3 real-life examples such as voice assistants and self-driving cars."

Report (R):

The output should show three versions with increasing levels of clarity and specificity

Final Prompt :

Act as a prompt engineering specialist. Take the given weak prompt and rewrite it three times to progressively improve clarity, specificity, and effectiveness. Each version

should provide more context, clearer instructions, and better-defined output expectations than the previous version.

40. Job Posting Creation

Write a job posting for Restaurant Manager at Food Palace Restaurant. Include responsibilities, requirements, and benefits.

Role (R):

HR Job Description Writer

Task (T):

Create a professional job posting for a Restaurant Manager position

Context (C):

The job is for Food Palace Restaurant and should clearly explain responsibilities, qualifications, and employee benefits

Few Shot (F):

Example:

Responsibilities: Manage daily restaurant operations

Requirements: Hospitality degree and leadership skills

Benefits: Competitive salary and career growth opportunities

Report (R):

The output should be professional, attractive, and structured for job seekers

Final Prompt :

Act as an HR job description writer. Create a professional job posting for the position of Restaurant Manager at Food Palace Restaurant. Include clearly structured sections for Responsibilities, Requirements, and Benefits. Use simple, professional, and attractive language suitable for job seekers and highlight leadership, customer service, and restaurant management skills.

41. Resume Summary Builder

Create a professional summary for a resume based on the following details:

Experience: 3 years as a Restaurant Supervisor

Skills: Customer Service, Team Leadership, Inventory Management

Achievements: Increased customer satisfaction by 20%

Role (R):

Professional Resume Writer

Task (T):

Create a professional resume summary from the given information

Context (C):

The summary should highlight experience, skills, achievements, and career value in a concise format

Few Shot (F):

Example:

Input: 2 years experience in customer service, strong communication skills

Output:

“Dedicated customer service professional with 2 years of experience delivering exceptional client support and improving customer satisfaction.”

Report (R):

The summary should be concise, impactful, and suitable for a professional resume

Final Prompt :

Act as a professional resume writer. Create a concise and impactful professional summary based on the given experience, skills, and achievements. Highlight key strengths, expertise, leadership abilities, and career value in a professional tone suitable for a resume.

42. Business Proposal

Write a proposal for “Healthy Meal Delivery Service” to investors. Include objectives, methodology, and benefits.

Role (R):

Business Proposal Writer

Task (T):

Write a professional business proposal for a healthy meal delivery service

Context (C):

The proposal is intended for investors and should explain the business concept, operational approach, and potential value

Few Shot (F):

Example:

Objective: Provide nutritious meals to busy professionals

Methodology: Partner with local chefs and use an online ordering platform

Benefits: Improved customer health and recurring revenue opportunities

Report (R):

The proposal should be persuasive, professional, and clearly communicate business potential

Final Prompt :

Act as a business proposal writer. Write a professional proposal for a Healthy Meal Delivery Service targeted at investors. Clearly include sections for Objectives, Methodology, and Benefits. Use persuasive and formal language to highlight market demand, operational feasibility, customer value, and business growth potential. Present the proposal in a structured and investor-friendly format.

43. Opinion Writing

Write an opinion piece on “Fast Food”. Use persuasive arguments and examples.

Role (R):

Opinion Article Writer

Task (T):

Write a persuasive opinion piece about fast food and its impact on health and lifestyle

Context (C):

The article should present a clear viewpoint on fast food, discussing both advantages and disadvantages with simple examples

Few Shot (F):

Example:

“Frequent fast food consumption can lead to health problems such as obesity and low energy levels.”

Report (R):

The output should be structured, persuasive, balanced, and supported with logical arguments and examples

Final Prompt :

Act as an opinion article writer. Write a persuasive opinion piece on “Fast Food.” Present a clear viewpoint supported by logical arguments and real-life examples. Discuss its effects on health, lifestyle, convenience, and eating habits using simple and convincing language. Keep the article structured, engaging, and balanced.

44. Debate Preparation

Prepare arguments for both sides of the debate: “Homemade Food vs Fast Food”

Role (R):

Debate Preparation Expert

Task (T):

Prepare balanced arguments supporting both homemade food and fast food

Context (C):

The debate is intended for students and should present fair, simple, and logical points for both sides

Few Shot (F):

Example:

Homemade Food Side: “Homemade food is healthier and contains fewer preservatives.”

Fast Food Side: “Fast food saves time and offers convenience for busy people.”

Report (R):

The response should provide structured and balanced arguments for both viewpoints

Final Prompt :

Act as a debate preparation expert. Provide well-structured arguments for both sides of the topic “Homemade Food vs Fast Food.” Include clear points, practical examples, and simple reasoning supporting each side. Ensure the arguments are balanced, engaging, and suitable for a classroom debate.

45. Travel Planning

Plan a 5-day food tour in Italy for a single adult. Include activities, budget, and tips.

Role (R):

Travel Planner and Food Tour Designer

Task (T):

Create a detailed 5-day food travel itinerary in Italy

Context (C):

The traveler wants to explore famous Italian foods, restaurants, local cuisines, and cultural food experiences

Few Shot (F):

Example:

Day 1: Visit Rome and try authentic pasta and pizza

Budget: €150–€200/day

Tip: Try local family-owned restaurants for authentic taste

Report (R):

The itinerary should be practical, organized, and include daily activities, estimated costs, and travel tips

Final Prompt :

Act as a travel planner and food tour designer. Create a detailed 5-day food travel itinerary for a single adult visiting Italy. Include daily food experiences, famous local dishes, restaurant recommendations, estimated daily budgets, and practical travel tips. Keep the plan realistic, well-structured, and easy to follow.

46. Book/Movie Review

Write a review of the movie “Chef”. Include plot summary, strengths, weaknesses, and recommendation.

Role (R):

Movie Review Writer

Task (T):

Write a structured review of the movie “Chef”

Context (C):

The review should discuss the storyline, acting, emotional impact, strengths, weaknesses, and overall recommendation

Few Shot (F):

Example:

Plot: A chef starts a food truck business after leaving his restaurant job

Strengths: Emotional storytelling and food visuals

Weaknesses: Predictable ending

Recommendation: Great movie for food lovers

Report (R):

The review should be balanced, engaging, and easy for general audiences to understand

Final Prompt :

Act as a movie review writer. Write a structured review of the movie “Chef.” Include a brief plot summary, major strengths, weaknesses, emotional impact, and a final recommendation. Use a balanced and engaging tone suitable for general audiences and food lovers.

47. Personal Development

Give actionable advice on how to maintain a healthy diet and lifestyle naturally.

Role (R):

Health and Personal Development Coach

Task (T):

Provide practical advice for maintaining a healthy lifestyle through daily habits and mindset changes

Context (C):

The advice should focus on natural and realistic methods such as balanced eating, exercise, sleep, hydration, and positive habits

Few Shot (F):

Example:

“Drink enough water daily and reduce processed food intake to improve overall health.”

Report (R):

The response should be practical, realistic, safe, and easy to follow

Final Prompt :

Act as a health and personal development coach. Provide actionable and practical advice on how to maintain a healthy diet and lifestyle naturally. Include daily habits, balanced nutrition tips, exercise suggestions, hydration, sleep improvement, and positive mindset shifts. Ensure the advice is realistic, safe, and easy to follow.

48. Multi-step Research Task

Step 1: Find the top 5 reasons customers choose a restaurant.

Step 2: Based on those reasons, suggest 5 practical ways a restaurant can attract more customers.

Role (R):

Restaurant Market Research Analyst

Task (T):

Identify key factors influencing restaurant choice and recommend strategies to attract customers

Context (C):

The response should first analyze customer preferences and then connect each preference to a practical business improvement strategy

Few Shot (F):

Example:

Reason: Affordable pricing → **Solution:** Offer value meal combos and discounts

Report (R):

The output should be structured into two clear steps and focus on practical, real-world restaurant improvements

Final Prompt :

Act as a restaurant market research analyst. First, identify and list the top 5 reasons customers choose a restaurant. Then, based on each reason, suggest practical and actionable strategies that restaurant owners can implement to attract more customers. Present the response in a clear two-step format with simple explanations.

49. Idea to Execution

Step 1: Generate 5 food business ideas.

Step 2: Pick one idea and create a marketing strategy for it.

Role (R):

Food Business Strategy Consultant

Task (T):

Generate food-related business ideas and develop a marketing strategy for the best option

Context (C):

The response should first present multiple business ideas and then select the most promising one for marketing planning

Few Shot (F):

Example:

Idea: Healthy meal subscription service

Strategy: Target working professionals through social media advertising and fitness partnerships

Report (R):

The output should be practical, business-oriented, and clearly structured in two steps

Final Prompt :

Act as a food business strategy consultant. First, generate 5 innovative food business ideas. Then select the most promising idea and create a simple marketing strategy for it. Include the target audience, unique selling proposition, promotional channels, and customer acquisition methods. Keep the response practical, structured, and easy to understand.

50. Universal Prompt Builder

[Role] + [Task] + [Context] + [Example] + [Format]

Example:

You are a restaurant consultant. Create a weekly meal plan for a family of four. Include breakfast, lunch, dinner, and healthy snacks. Format the response as a table.

Role (R):

Prompt Engineering Expert

Task (T):

Create a reusable prompt template using Role, Task, Context, Example, and Format

Context (C):

The user is learning prompt engineering and needs a universal template that can be applied to any topic or industry

Few Shot (F):

Example:

“You are a restaurant consultant. Create a weekly meal plan for a family of four. Include breakfast, lunch, dinner, and healthy snacks. Format the response as a table.”

Report (R):

The output should define a clean, reusable prompt structure and explain what information belongs in each section

Final Prompt :

Act as a prompt engineering expert. Create a universal prompt template using the structure: Role, Task, Context, Example, and Format. Clearly explain the purpose of each section and provide a reusable template that can be adapted for any subject, profession, or use case. Ensure the template is simple, structured, and easy for beginners to apply.
